**Declaration in Support of Accompanying Petition to Make Special  
Reason X--Relates to HIV/AIDS or Cancer**

In support of the accompanying Petition to Make Special, applicant declares as follows:

1. I am the applicant in the above-identified patent application.
2. Colorectal cancer (CRC) is the 2<sup>nd</sup> most prevalent form of cancer in the United States. Fortunately CRC may be prevented in most individuals through colonoscopic screening and removal of polyps and precancerous lesions. The invention described in US patent application 10/661,159 improves the navigational capabilities of colonoscopes such that physicians may diagnose and treat CRC earlier when it is more curable. When cancer is not yet present, the improved endoscopic navigation enabled by the invention may help physicians identify and remove more polyps, thus preventing CRC altogether in many cases.
3. I further declare that all statements made herein of my own knowledge are true and that all statement made upon information and belief are believed to be true, and further that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States Code, and that such willful false statements may jeopardize the validity of the application and any patent issuing therefrom.

Very Respectfully

  
Jaime S. Vargas
